Choice Board Background Information:

- ✓ Choice boards were created to provide flexibility in learning at home;
- ✓ Boards were planned for divisions: K-3, 4-6, 7-8 for open, individualized learning;
- ✓ Planned with recognition that parents may currently hold various roles at home;
- ✓ Designed to enhance the materials provided by the Ministry;
- ✓ Experiential learning focus with accessible materials at home;
- ✓ Low/No tech options;
- ✓ Accessible on mobile devices.

Choice Boards - Parents Can:

- ✓ Choose as many or as few learning opportunities as desired;
- ✓ Follow the days of the week or be flexible in using the choice boards;
- ✓ Be confident that the learning is based in curriculum;
- ✓ Engage other children in the home in common experiential learning (i.e., baking, reading, playing math games, being active together);
- ✓ Click on the links provided for further learning and sample questions to ask;
- ✓ Have fun!

Explanatory Notes: LEARN AT HOME CHOICE BOARDS FOR PARENTS AND EDUCATORS

Choice Boards - Teachers Can:

- ✓ Create classroom-based choice boards for students while they are learning at home;
- ✓ Incorporate ideas from the choice boards into teaching practices, daily and weekly planning;
- ✓ Explore and incorporate new resources into classroom learning;
- ✓ Engage students and families in virtually sharing learning with one another;
- ✓ Expand on activities in order to provide individualized learning opportunities;
- ✓ Incorporate other UCDSB resources (i.e., Math Tool, VLC, links) to extend student learning.

Choice Board Activities Provide:

- ✓ Clear connections to curriculum expectations and process skills;
- ✓ Open activities with options to individualize learning;
- ✓ Accessibility (many require little to no technology);
- ✓ Math – focus on numeracy skills;
- ✓ Literacy – focus on reading, writing, oral language and media literacy;
- ✓ French learning opportunities;
- ✓ Health and Physical Well-Being;
- ✓ Opportunities to foster connections within the household;
- ✓ Focus on conversation and thinking.

How Many Forks?

https://www.instagram.com/p/B-sS1qjhhuT/?utm_source=ig_web_copy_link

How many forks do you think your family should have?

How did you come up with that number?

Ru**b**icon

© 2020 Rubicon Publishing Inc.

SAMPLE RESPONSE

We need more than four forks since everyone usually has a fork at dinner and there are four people in my house, but sometimes we might want a snack, so I think six forks are enough. **OR** I think 10 forks are enough. We don't like to keep washing them, so we need forks for at least two meals and maybe we should have some extra forks.

Combination of Feet

Listen to the story [One is a Snail Ten is a Crab](#)

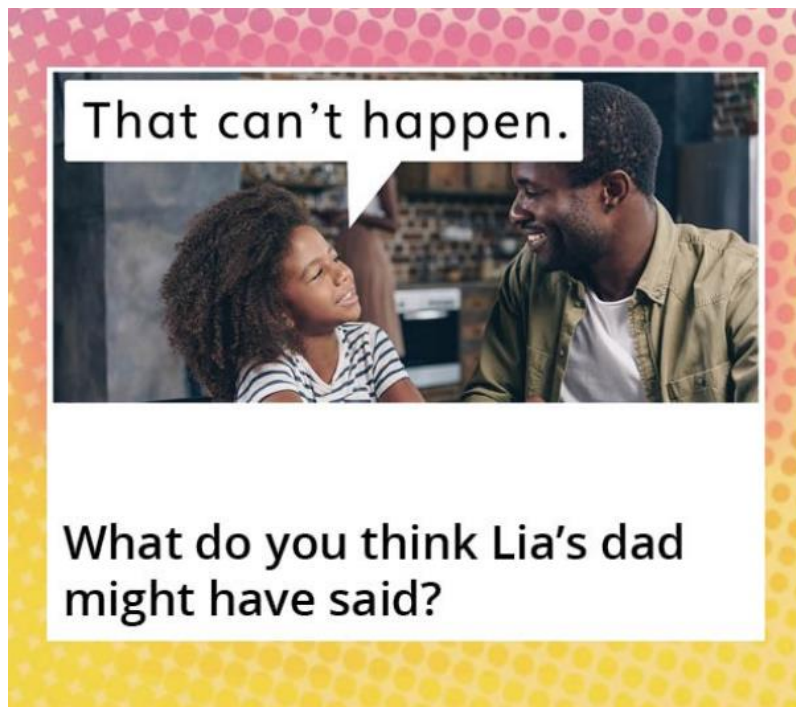

- If there are 8 feet on the beach, who might be on the beach?
- Are there other possibilities?
- Change up the numbers to uncover who might be on the beach.
- How many feet are in your house?

What might Lisa's dad have said?

ADDITIONAL SUPPORT

And the Point Is ... ⓘ

This Minds On Activity is intended to introduce the idea of an event that is impossible. The concept of certainty will be introduced, along with the relevant vocabulary, as the second part of the Minds On Activity.

At this point, introduce the words event and impossible.

Then have students turn and talk to a classmate about something that is just the opposite — something that has to happen. Introduce the word certain.

Model the idea of using a conditional statement as one way to state certain events. For example, "If today is Wednesday, then tomorrow is Thursday."

Ru**b**icon

© 2020 Rubicon Publishing Inc.

SAMPLE RESPONSE

What do you think Lia's dad might have said?

E.g., Her dad might have said, "If you eat all your vegetables, you will grow a metre taller by tomorrow."

OR

Her dad might have said, "There will be two Fridays this week."

How Many Fish?

Photo: T. Macintosh

Margaret Kanayok, Holman

http://www.ottawainuitchildrens.com/wp-content/uploads/2018/03/Part1_InuuqatigiitCurriculum.pdf

- What do you notice? (see)
- What do you wonder? (question)
- How many fish are there?
- How did you get that number?
- What numbers do you see?
- Another child counted fish a different way, how might they have counted?

Racing to Understand

Adapted from <http://mr-shrek.blogspot.com/2013/05/racing-to-understand-place-value-in-eyfs.html?spref=tw>

Required Materials:

- ☐ A tube (wrapping paper roll; paper towel; pvc pipe; rolled-up card stock)
- ☐ Small items (like vehicles) that roll that fit through your tube
- ☐ Measuring tape, painters tape or chalk

Instructions:

1. Position the tube so that one end touches the floor and the other is propped up.
2. Where the tube hits the ground, mark off a number line using either the measuring tape, painters tape or chalk (if outside).
3. Send the vehicles down the tube individually. Record how far they went.
4. Repeat several times.

Think about the following questions:

1. Which vehicle went the farthest?
2. If you were to pick one vehicle to enter a race, which one would you definitely choose? Which one would you not choose?

Explore: What happens if we make the tube steeper? How do the distances travelled change?

Car	Distance Travelled		
	Trial 1	Trial 2	Trial 3

Create a Weigh Station

Required Materials:

- ☐ A clothes hanger with notches
- ☐ Some small containers (we used apple sauce containers)
- ☐ String
- ☐ Small loose parts (buttons, coins, small toys, etc.)

Instructions:

Step 1: Create a weigh station by attaching equal lengths of string to your two containers. We poked holes in our apple sauce containers and used about 1 m of yarn. Tie the yarn in a knot.

Step 2: Hang the hanger on a door knob. Attach the containers to the hanger.

Step 3: Place an object in one of the containers.

Estimate how many of another object it will take until the hanger is balanced. (We wanted to discover how many Lego it would take to balance the Green Lantern!)

Step 4: Add objects to the other cup until your hanger is balanced. Count the items. Observe that we are using items of the same size. *(When we first measured, we ended up using different size pieces of Lego. This was a great opportunity to have a conversation about how our unit of measure needed to be constant. We then tried again, using all 4x2 Lego bricks.)*

What else would balance the item(s) you are weighing? Can you find different weights for different items? How does the size of the measuring affect how many items you need?

Shape Hunt

Look for shapes around your house (or while out for a walk).
Keep a tally of how many of each shape you find.
Create a chart of shapes by colouring a cell for each shape.

How Many Shapes I Found

Which shape did you find the most of? Did this surprise you?
Which shape did you find the fewest of?
What shapes did you see that were not on the sheet?
What was the difference between the number of circles and triangles you found?

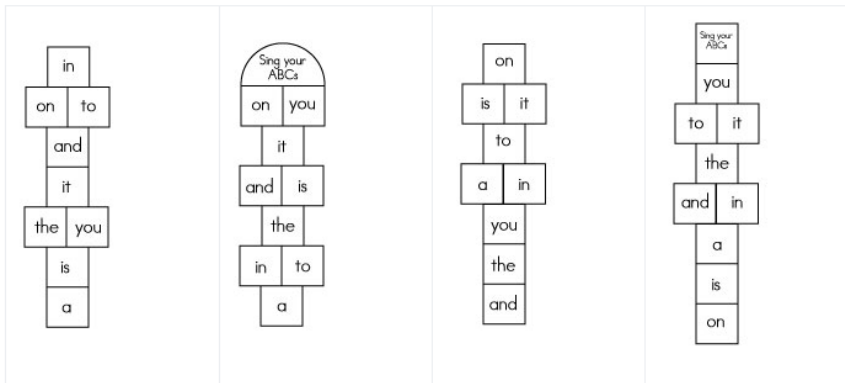

Activity B – Sight Word Hopscotch

Activity from <https://www.sightwordgame.com/sightwordgames/hopscotch/>

Make Sight Word Hopscotch

All that is required for this fun game is a few sight words and sidewalk chalk. Using chalk, create a hopscotch pattern. Below please find four common patterns. On rainy days, consider using masking tape on a floor and write each sight word on a piece of tape or index card – just make sure your child does not slip on the index card while playing the game.

Sight Word Hopscotch Patterns

Play Sight Word Hopscotch

The youngest player goes first and begins by tossing his marker, e.g., a pebble or beanbag, into the first square. The marker must land in the square without touching the lines. If the marker does not land in the first square, his turn is over. If the marker lands in the first square, he must hop over the first square and then continue hoping through the hopscotch pattern saying each sight word as he lands on that square. When he gets to the last square, he must turn around and hop back saying each sight word again. He must pick up his marker without touching the first square and then complete the course by hopping on it. If he successfully completed the course, he would proceed to the next square by tossing his stone to the second square and continue hopping as stated above. He must do this for each square.

A player must hop on one foot on the single squares and straddle the double squares. If a player does not hop with the proper foot, hops on the lines or loses balance while picking up her marker, her turn is over. She would begin her next turn on that square. The first player to complete the course wins the game. For younger players, consider adding a neutral square, e.g., home and allow players to rest at the end of the course. While resting they can recite the alphabet.

Activity B – Sight Word Hopscotch

Activity from <https://www.sightwordsgame.com/sightwordgames/hopscotch/>

Activity B – Sight Word Hopscotch

Activity from <https://www.sightwordgame.com/sightwordgames/hopscotch/>

Author: Amy Clark

<https://www.momadvice.com/post/homemade-sidewalk-chalk-paint-recipe>

Activity C – Playdough Mats

Recipe courtesy of:

<https://stayathomeeducator.com/absolutely-perfect-no-cook-scented-play-dough-recipe-without-cream-tartar/>

No-Cook Playdough Recipe Without Cream of Tartar

1 cup flour
¼ cup salt
¾ cup of water minus 3
tablespoons
3 tablespoons of lemon juice
1 tablespoon of cooking oil

Measure water and lemon juice in a glass, heatproof, microwavable bowl. Heat in the microwave until just boiling, about three minutes.

Meanwhile, mix together the flour, salt and cooking oil. Set aside.

Add a few drops of food colouring to the water and lemon juice mixture, if desired.

Slowly pour the water and lemon juice into the flour mixture.

Stir until the mixture forms into a dough.

If needed, drop the hot dough onto a countertop and knead with hands. (Only for adults). The dough may be slightly sticky until it completely cools.

Activity D – The Name Game

Every letter has a name. Can you name all 26 letters?

We use UPPERCASE and lowercase letters in print.
Can you name all the UPPERCASE and lowercase letters?

Play the Name Game. Click the image below:

Thank you!

Click right to learn more about language & literacy!

Children need to learn to read *and* read to learn.

Literacy – the ability to read and write – enables us to communicate with others and learn about our world. To develop literacy skills, children first need **speech and language** skills.

Help your child develop strong literacy skills.

Children start to develop literacy skills by looking at words in their environment, including in books, on signs or in logos. Research has shown that one of the best ways you can promote literacy in your child is by **reading together**.

Children with language impairments are

4 to 5

TIMES MORE LIKELY to have reading difficulties while in school.

Up to **30%** of children with speech disorders also have a reading disability.

Speech-language pathologists can help

Children with speech or language disorders are more likely to have difficulties with literacy. Follow your child's literacy development by looking out for these milestones:

- 1 YEAR OF AGE:** shows an interest in picture books.
- 2 YEARS OF AGE:** knows to hold books the right way up and turns the pages.
- 3 YEARS OF AGE:** understands that printed words have a function (on menus, lists, signs, etc.).
- 4 YEARS OF AGE:** can think of simple rhymes (e.g., toy and boy).
- 5 YEARS OF AGE:** knows all letters of the alphabet.

FSL – Activity E

Les étoiles dans le ciel

Les étoiles dans le ciel

Brillent, brillent comme elles sont belles

Une par une, elles s'allument

Pour bien éclairer la lune

Les étoiles dans le ciel

Brillent, brillent comme elles sont belles!

Twinkle, Twinkle Little Star

Twinkle, twinkle, little star,

How I wonder what you are.

Up above the world so high,

Like a diamond in the sky.

Twinkle, twinkle, little star,

How I wonder what you are!

The Phonics Song

Activity E – The Phonics Song

The 26 letters of English make 44 sounds!

Every letter has a NAME. Every letter has a SOUND. Animals have a name and a sound, too!

Can you make ALL the sounds for the letters of the alphabet?

Click the image above to learn the sounds our letters make!

Thank you!
